Experience

Freelance projects | MH
Front-End Web Developer | 11/2023 - 02/2026
Built responsive and visually engaging web pages using HTML, CSS, and JavaScript. Developed reusable UI components to improve consistency and development speed. Implemented interactive features such as form validation, sliders, and dynamic content using JavaScript and jQuery. Optimized websites for mobile devices, cross-browser compatibility, and performance. Applied Git for version control, tracking changes, and collaborating on projects. Improved page load speed by optimizing images and code structure. Ensured accessibility and usability across different screen sizes.
